Introduction

I specialize in web development, primarily on the front end, which I find both engaging and challenging thanks to the focus on user experience.

During my time studying towards a master's degree in Computer Science I've been working part time as a freelancing web developer, utilizing the flexibility of WordPress to deliver dynamic and streamlined web sites for organizations. I've also been active in a number of school organizations and projects, where I've worked a lot with Rubybased web frameworks.

Education

Master of Science degree in Computer Science — 2011.08–present

Kungliga Tekniska Högskolan, *Stockholm, Sweden*

Ongoing M.Sc. degree with just the master's thesis remaining.

Bachelor of Science degree in Computer Science — 2008.08–2011.06

Kungliga Tekniska Högskolan, *Stockholm, Sweden*

Experience

Developer — 2013.08–present

Advisa AB, *Stockholm, Sweden*

Full stack (front and back end) web application and infrastructure development utilizing JavaScript technologies (notably AngularJS).

Web developer, internship — 2013.01–2013.03

Net Gaming Europe AB, *Stockholm, Sweden*

Responsible for developing the frontend for an online casino site launched during the internship. The site used WordPress as a platform and my job involved design work and development of a responsive casino site accessible by a multitude of devices.

Web developer, part time — 2011.03–2012.07

Polisförbundet, *Stockholm, Sweden*

Developed and launched a WordPress-based web site for Polistidningen, a magazine for members of the Swedish Police Union. I implemented a web design by specification along with a number of custom plugins for the site. I have also set up and maintained their web servers (Windows and Linux).

Web developer and designer, part time	2009.09–2012.05

Sveriges Ingenjörer, *Stockholm, Sweden*

Developed a new web site for Ingenjören, a regularly published magazine for members of Sveriges Ingenjörer. I have since the launch in 2009 provided support and developed several additions for the site, which is is built upon WordPress.

Web developer and designer, contract	2010.05–2010.11

Sveriges Ingenjörer, *Stockholm, Sweden*

Designed and implemented a new WordPress theme for Ingenjörsbloggen, the official blog of Sveriges Ingenjörer.

User and systems tester	2008.06–2008.07

Siemens IT Solutions and Services, *Solna, Sweden*

Worked as a tester on a SAP system being developed for a large company during the summer break.

Extracurricular experience

30-year anniversary organizer	2012.05–2013.11

Kungliga Tekniska Högskolan, *Stockholm, Sweden*

Organized the 30th year anniversary of the computer science chapter together with a group of five other people. My responsibilities included managing the web site and communications channels as well as planning and carrying out events for up to 700 people.

Mentor for new students	2009–2012

Kungliga Tekniska Högskolan, *Stockholm, Sweden*

Worked as a mentor for the new computer science students arriving each year, where I get to practice my leadership and pedagogic skills during a month of intensive work.

Technical skills

Languages: HTML, CSS, JavaScript, Java, Ruby, PHP, C(++) and Python.
