Education

Kungliga Tekniska Högskolan (The Royal Institute of Technology), Stockholm, Sweden

■ **Master of Science degree in Computer Science**   *2008.08–present*

Completed bachelor's degree and ongoing master's degree in computer science.

Åva Gymnasium, Täby, Sweden

■ **Technological education program**   *2005.08–2008.06*

Three years of study in upper secondary school, with a math and computer science profile.

Experience

Polisförbundet (The Swedish Police Union), Stockholm, Sweden

■ **Web developer**   *2011.03–present*

Developed and launched a WordPress-based web site for Polistidningen, a magazine for members of the Swedish Police Union. The work consisted of implementing a web design by specification along with developing a number of custom functionalities specific to the site. I have also maintained and configured their web servers (both Windows and Linux environments) since the launch.

Sveriges Ingenjörer (The Swedish Association of Graduate Engineers), Stockholm, Sweden

■ **Web developer and designer**   *2010.05–2010.12*

Designed and implemented a new design for Ingenjörsbloggen, the official blog of Sveriges Ingenjörer. The project, developed as a WordPresstheme, also included implementation of social network functionalities.

■ **Web developer and designer**   *2009.09–present*

In 2009 I developed and launched a new WordPress-based web magazine for Ingenjören, a regularly published magazine for members of Sveriges Ingenjörer. I have since then provided support and developed several additions for the site.

Siemens IT Solutions and Services, Solna, Sweden

■ **User and systems tester**   *2008.06–2008.07*

Worked as a tester on a SAP system being developed for a large company during the summer break.

Siemens Power Generation, Upplands Väsby, Sweden

■ **Server/System maintenace**   *2005–2007*

Maintained and installed various servers and workstations during the holidays.

Technical expertise

I have a broad knowledge in and experience with programming in general but specialize in web development, primarily on the front end (interface and design implementation).

Languages: HTML, CSS, JavaScript/jQuery, Java, Ruby, PHP, C(++), basic C#.net and Python.

Tools: WordPress, Ruby on Rails, Regular expressions, Git, Subversion, LaTeX and shell scripting.

Software: MySQL, Apache, IIS, Eclipse, Visual Studio, vim, Adobe Photoshop and Mirosoft Office.

Operating systems: Microsoft Windows, Unix/Linux and Mac OS X.

Languages

Swedish is my native language. I also speak and write **English** on an academic level.

Extracurricular experience

I have been active in a number of organisations and groups during my time studying at the university.

Kungliga Tekniska Högskolan (The Royal Institute of Technology), Stockholm, Sweden

- **30-year anniversary organizer**   *2012.05–present*

  I organize the 30th year anniversary of the computer science chapter together with a group of five other people. The anniversary involves multiple events of different sizes (each one enganging between 40 and 700 people) leading up to the 30th birthday of the chapter.

- **Mentor for new students**   *2009, 2010, 2011, 2012*

  I have, since my second year at KTH, worked as a mentor for the new computer science students arriving each year. This involves elaborate planning and full time work during the first three weeks of the semester.
